

BielSystems

Web applications and internet consulting in Brazil

<http://bielsystems.com.br>

BielSystems is a consulting firm specialized in web application development for the corporate market and internet consulting which includes web development, e-commerce, web marketing and SEO (Search Engine Optimization).

History

BielSystems was founded in 2004 with the purpose of developing and commercializing a system of reverse auction named **BielTender**.

The idea started when the partners heard from an auction in Europe and decided to offer this kind of service in Brazil.

In 2005 **BielSystems** sponsored the 6th Congress of Purchases which is an important event for purchase departments in Brazil. **BielTender** was officially released there.

History

In October, 2006 **BielSystems** released **BielBid**, which is a system created to improve the speed of quotation process with state-of-the-art in technology and user interface. We used resources never seen in Brazilian software development scenario.

At the end of 2006 two more services were released: **Blog Empresa** for the development of corporate blogs and **EmailFax**, a service for sending and receiving fax by internet.

In May, 2007 we bought a hosting company to attend our clients. Today we have expertise in developing and hosting web applications.

Mission

To develop new tools, solutions and methodology, with creativity, technology and security, based on ethical principles focusing on maximizing the results for our clients, with high level of quality.

Vision

To be known as a leader in corporative systems with high level of quality and security based on internet and to be reliable inovator and solution integrator offering competitive profits for our clients

Our Products

**BielTender**

BielBid

EmailFax

BielTender

BielTender is a powerful electronic business tool for reverse auctions. With BielTender the suppliers present their proposals by negotiations rounds, one proposal per round and they don't know how many rounds the reverse auction has.

It is a system which has a particular model of reverse auction. This model can provide transparency, security and agility in the processes of quotation with significant reduction of the prices.
